Smit Patel
98754210 | smit.patel.dev@example.com | linkedin.com/in/smit-patel-dev | github.com/smit-dev

Summary

Experienced Software Engineer with a solid understanding of full-stack development, cloud computing, and AI solutions. Passionate about designing scalable applications, leading engineering teams, and optimizing system performance. Adept at emerging technologies, automation, and best coding practices.

Skills

Languages: Java, Python, JavaScript, SQL
Frameworks: Spring Boot, Hibernate, TensorFlow, PyTorch
Cloud: AWS (Certified Solutions Architect), Azure, GCP
DevOps: CI/CD Pipelines, Docker, Kubernetes
AI/ML: Deep Learning, Neural Networks, NLP, Computer Vision
Databases: SQL, MongoDB
Methodologies: Agile, Scrum

Experience

Senior Software Engineer | InnovateAI Solutions, Bangalore, India (03/2020 - Present)
• Led the design and development of a new AI-powered analytics platform using Python, TensorFlow, and AWS services (SageMaker, S3, Lambda).
• Architected and deployed scalable microservices for real-time data processing, improving system efficiency by 30%.
• Mentored a team of junior engineers, fostering best practices in code quality and system design.
• Integrated advanced machine learning models into client applications to provide predictive insights.

Software Engineer | TekSys India Pvt. Ltd., Pune, India (06/2016 - 02/2020)
• Developed and maintained full-stack web applications for enterprise clients in the finance and healthcare sectors using Java, Spring Boot, and JavaScript.
• Collaborated in an Agile team to deliver features across the full software development lifecycle, from concept to deployment.
• Contributed to a key project that increased client user engagement by 20% through performance optimization and new feature implementation.

Education

B.Tech, Computer Engineering | Pandit Deendayal Energy University, Gandhinagar, India
Graduated: May 2015

Certifications
• AWS Certified Solutions Architect
• Google Professional Cloud Developer
